

IMPROVING THE QUALITY OF LIFE

of the Inhabitants of the
Sidama Region by Ensuring
the Availability and
Sustainable Management of
Water Resources

Budget

69 564 541,77 CZK

Duration

2020 – 2025

Implementor

Sidama Water Supply VI

Implementation

This is a partnership that has been tested for years, which gives the contracting authority (CzDA) the certainty that the project will be implemented in the required quality, and in this way will spread positive awareness of the impacts of Czech Development Cooperation in the recipient country.

The Aim

The aim of the project is to ensure that all inhabitants of the selected kebeles and towns have access to water and sustainable management of water resources.

Partnerships

The project is implemented by a consortium Sidama Water Supply VI, composed of partners from the private (Ircon, s. r. o. and SG Geotechnika a.s.) and non-profit sectors (People in Need, o.p.s.) of international scope, in close cooperation with an Ethiopian partner (AquaCon Engineering plc.) and local authorities responsible for providing drinking water.
